Makiah Eustice

Founder / Aeronautical Engineer

#24Under24

THE  
MARS  
GENERATION®

## Makiah Eustice

### **Achievement:**

Developmental engineer,  
United States Air Force

Makiah shoots for the stars! She is an aerospace engineer. She is a member of the US Air Force. She is a musician. Makiah wants to build on her experiences. She wants to become a leader in aviation, space, and defense.

Young Makiah loved to dance, sing, and collect rocks. She knows the connection of music to soundwaves. Also, the connection of rocks to the sediments of Mars. At college, she attended adult Space Camp USA. She knew she wanted to become an Air Force officer and an astronaut. She hasn't been to space yet but has lived in space-like environments. These conditions simulate living on Mars and the Moon.

Makiah hopes to help other girls see themselves in STEM and discover that STEM is a tool to strengthen any passion!
