• Madalynne LaLanne

Achievement:

Environmental test
technician at SpaceX

Maddy has been asking questions as long as she can remember. As a kid, she wanted to know how things worked. She wanted to know why events were happening. She later enjoyed doing experiments. She wanted to understand physics.

Maddy is an environmental test technician. She works at SpaceX and wants to be an engineer. She tests different parts of satellites in situations that they will go through in space. Before SpaceX, she helped NASA. She designed and built equipment to test satellites.

Maddy's advice is that science isn't as scary as it may seem. Take problems one step at a time. Keep trying, experiment, and never stop asking questions.
